## WORK EXPERIENCE

### Senior Software Engineer REDMATH

08/2018 – Present

Lahore, Pakistan

#### Achievements/Tasks

- Develop new features in frontend and its backend as per client requirements.

### Software Engineer REDMATH

03/2016 – 08/2018

Lahore, Pakistan

#### Achievements/Tasks

- Worked onsite with client in Amsterdam which included presentations, brainstorming and peer programming.
- Develop RESTful Web Services using spring boot, JPA, Oracle DB and document with swagger. Run static code analysis tools like checkstyle, pmd, findbugs and sonarqube as part of build. Use GitLab for issue tracking and CI/CD. Run OWASP scan for CVE and OWASP ZAP to hunt vulnerabilities preemptively.
- Spearheaded two fresh graduates from training to actual development. Reviewed merge requests critically to be added to deployment pipeline.
- Contributed reusable web components to an internal library build in AngularJS. Introduced ES6 and used Babel for transpilation while Webpack for packaging.
- Participated in an activity of transformation of UI of some front-end applications making it responsive according to new style-guide.

### Associate Software Engineer REDMATH

10/2014 – 03/2016

Lahore, Pakistan

#### Achievements/Tasks

- Migrated complete backend of application from Java 6 to 8 and used Java streams and nio API for better performance.
- Developed a health monitoring app in AngularJS for peer apps, consumes rest endpoints and show data with various analytics. Used grunt for packaging, karma/jasmine for unit tests while GitLab for issue tracking and CI/CD.
